agusmahari@gmail.com | <https://wa.me/6285900243566> | [linkedin.com/in/agus-mahari/](https://www.linkedin.com/in/agus-mahari/)

SKILLS

- **Programming Languages:** Python (Pandas, SQLAlchemy, BeautifulSoup, Request, Spark,), SQL
- **Tools:** Hadoop (HDFS, Hive, Impala, Cloudera), MongoDB, PostgreSQL, Tableau, Looker, SSIS, Pentaho, Apache airflow, Apache spark, IBM Data Stage. Env Azure , Azure Synapse, DuckDB, Talend
- **Infrastructure :** GCP (Cloud Composer, BigQuery, GCS, Cloud SQL, Pub/Sub, DataProc, Compute Engine), AWS (S3, Redshift, EC2), Docker, Kubernetes, Microsoft Fabric, Snowflake
- **Techniques:** Data Warehousing, ETL Pipelines, Data Lake, Data Ingestion, CDC

PROFESSIONAL EXPERIENCE

PT ASTRA GRAPHIA INFORMATION TECHNOLOGY

Jakarta

Data Engineer placemen at **PT Astra Internasional Tbk.**

June 2024 - November 2025

- Data Pipeline Architecture: Designed and implemented multiple source and high volume data batch data pipelines using MS Synapse, Microsoft Fabric, GCP (Cloud Composer, BigQuery, GCS, Cloud SQL, Pub/Sub), SAP Environment, local file, DBT and Airflow for project Toyota Auto2000, Astra Honda Motor
- POC CDC with Debezium for real-time data ingestion use Redpanda, POC Snowflake For Datawarehouse
- Data Modeling & Warehousing: develop enterprise data warehouse solutions in Microsoft Fabric, Python, BigQuery, and Data Build Tools (DBT), optimized for transformation analytical workloads

Data Engineer placemen at **PT Toyota Astra Motor Tbk.**

Juli 2025 - November 2025

- End-to-end ETL workflows using Talend reducing data pipeline development time by 20% while enabling self-service monitoring via Talend's unified logging framework.
- Designed modular, reusable Talend components and documented pipeline standards, accelerating onboarding of new team members and enabling scalable integration

Data Engineer placemen at **PT Astragraphia Tbk.**

November 2025 - present

- Build architecture, Develop, Maintenance and perform ELT (Extract, Load, Transform) to process table source in Warehouse using python, SQL, Airflow to transform warehouse data into ML-ready datasets, ensuring reliability, efficiency, and data quality.

Data Engineer placemen at **PT Telekomunikasi Indonesia International.**

November 2025 - present

- Develop ELT (Extract, Load, Transform) to process table source in Warehouse and Create and optimize SSAS tabular model measures to streamline Power BI report development, enabling self-service analytics and reducing calculation complexity for end users

IYKRA

Jakarta

Data Engineer Consultant at **PT Bank Negara Indonesia Tbk.**

JULY 2023 - March 2024

- Develop and perform ELT (Extract, Load, Transform) to process table source in Teradata to Cloudera (Hive) using IBM Datastage; reduce ELT job running times by 20%.
- Develop and jobs pipeline for forming sources related to business Project BNI Corporate Transformation.
- Develop Data Mart and migration raw, intermediate, and data mart from Teradata to HDFS;

MIKTI

Jakarta

Trainer Data Analyst at **MSIB KAMPUS MERDEKA**

JANUARY 2023 - MEY 2023

- Design and develop training curriculum covering various aspects of data analysis, machine learning, and data engineering.
- Teaches various tools : Git, SQL, Python, Pandas, matplotlib, scikit learn, Airflow

IYKRA

Jakarta

Mentor and Trainer Assistance at **Komunitidata Data Fellowship**

SEPTEMBER 2023 - DECEMBER 2023

- Assisting participants in developing skills, sharing knowledge, and addressing participants questions related to the Data Fellowship with participants can impact their professional growth.

RUMAH ZAKAT

Bandung

Data Engineer at **Rumah Zakat**

APRIL 2022 - MEY 2023

- Manage end-to-end data pipelines, ensuring seamless integration of diverse input and output formats for impactful analytics. Construct and monitor the data warehouse infrastructure in SQL and BigQuery. crafting analytic dashboards using Looker Studio.

EDUCATION AND HONORS

UNIVERSITAS ISLAM NEGERI SUNAN GUNUNG DJATI BANDUNG

Bandung

Computer Science Department

JUNE 2016 - DECEMBER 2020

- Cumulative GPA: 3.4/4.0

ASTRONOMERS

Data engineer : DAG Authoring for Apache Airflow

AUGUST 2023

- Score Exame : 85/100

MISCELLANEOUS

Third place winner of the national data science tournament in 2023

NOVEMBER 2023 - JANUARY 2024

- Creating a scalable system using Docker, secure with Google VPC and managing security, as well as cost-effective in the usage of Docker, ELT tools, and data warehousing within the data infrastructure.
- Building an end-to-end data pipeline from raw data to information in GCP, Program JUARA GCP
